dondrianocrissan20@gmail.com

PROFESSIONAL SUMMARY

Full Stack Web Developer with professional experience building and maintaining responsive, database-driven web applications using Laravel, PHP, Vue.js, JavaScript, HTML, CSS, and MySQL. Experienced in developing end-to-end features, including database design, backend logic, REST APIs, authentication, role-based access control, and responsive front-end interfaces. Strong understanding of the complete web development lifecycle, from planning and development to testing and deployment.

WORK EXPERIENCE

Junior Web Developer - Switchconnect PTY LTD
September 2024 – January 2026 | Full-Time | Remote | Australian Company

- Built and maintained responsive, database-driven web applications using Laravel, PHP, Vue.js, JavaScript, HTML, CSS, and MySQL.
- Developed end-to-end application features from database schema design and backend development to front-end implementation and user interface delivery.
- Created and integrated RESTful APIs, authentication systems, and role-based access control for secure multi-user applications.
- Designed responsive and reusable user interfaces using Vue.js, Bootstrap 5, Tailwind CSS, HTML, and CSS.
- Collaborated remotely on feature development, troubleshooting, testing, and continuous improvements for web applications serving business requirements.

Programmer Intern - Public Employment Service Office (PESO)
April 2024 – July -2024 | Internship

- Developed Linang — an interactive educational system aligned with UN Sustainable Development Goals (Life Below Water, Life on Land), delivered on schedule for classroom deployment.
- Designed and implemented core interaction workflows and UI logic, demonstrating ability to scope, build, and ship a complete solution within a defined timeline.
